LLM-written candidate checks
“proper nouns do not belong in the miscellaneous field”
Select by agreement (F1)
check selected: rejected outputs 23% correct < F1/2 = 32%
filter discards every correct output for 84% of sentences with a misc. entity
category lost student recall 0.08 RL recall 0.37 → 0.11
Select under a budget $\hat{\gamma}_A \le \tau/2$
check refused: it would exceed the budget
certify γ on held-out model outputs (Clopper–Pearson U_B)
category kept student recall 0.31 RL recall 0.40
